

ANWAR MULLA

Mechanical Design Engineer | CAD Designer | AI Creative Designer

SOLIDWORKS • CATIA V5 • AutoCAD • AI Video • Product Visualization

MASTER PROFESSIONAL PORTFOLIO

Job Applications • Freelance CAD • AI Creative Services

01 — ABOUT ME

I am a mechanical design professional focused on CAD modelling, product development, engineering drawings and practical machine-design concepts. I am also developing skills in AI-assisted image creation, video generation and editing to communicate engineering ideas visually.

Professional Focus

Mechanical CAD • Product Design • Machine Concepts • Manufacturing Drawings • Assembly Design • AI-assisted Visualization • AI Video Editing

Career Objective

To contribute to mechanical design and product-development projects while combining engineering knowledge with modern CAD and AI creative tools.

Education & Profile

BE in Mechanical Engineering

02 — TECHNICAL SKILLS

Mechanical / CAD	AI & Creative
SolidWorks	AI Image Generation
CATIA V5	Image-to-Video
AutoCAD	AI Video Editing
3D Part & Assembly Design	Cinematic Video Creation
2D Manufacturing Drawings	AI Voice / Narration
Product & Machine Design	Prompt Engineering
Basic ANSYS / FEA	Video Editing & Content Creation

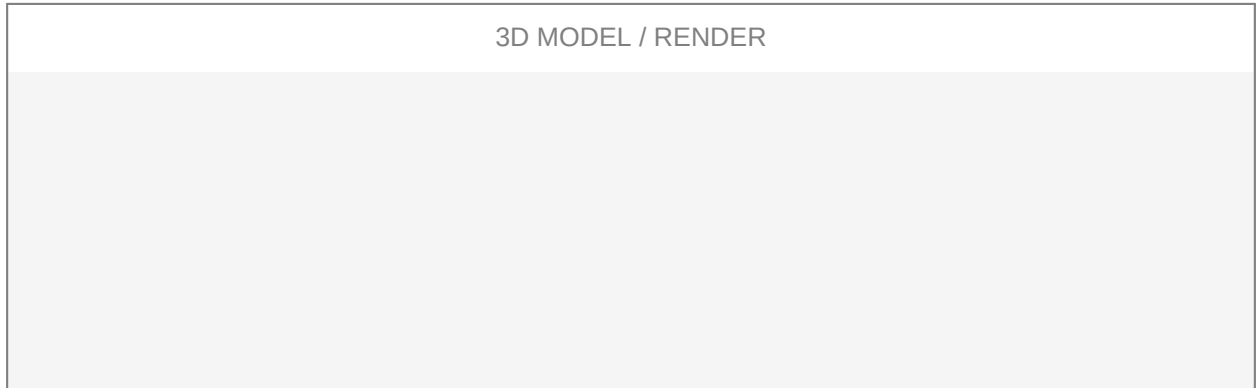

Software / Tools

SolidWorks • CATIA V5 • AutoCAD • ANSYS (basic) • MS Excel • AI image/video tools

03 — E-RICKSHAW CHASSIS DESIGN

Conceptual chassis development using mechanical CAD. The project can demonstrate frame layout, component placement, assembly structure and basic structural thinking.

PROJECT VISUALS

Design Workflow

Requirement → Concept layout → 3D frame modelling → Component/assembly development → Manufacturing drawing → Basic structural/FEA review → Design refinement.

Engineering Evidence to Add

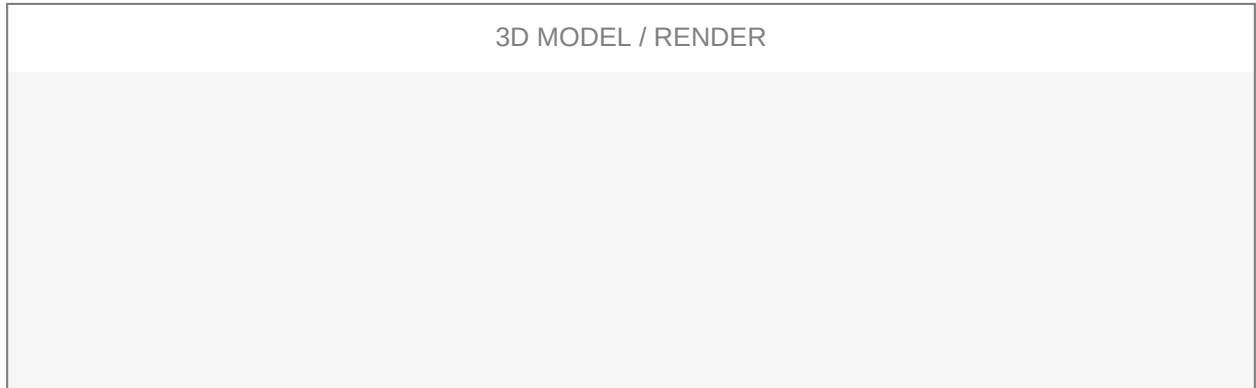

- Part drawings
- Assembly drawing
- Dimensions
- BOM
- Exploded view
- Analysis/results where applicable

NOTE: Replace the marked visual area with your actual CAD screenshots/renders for the final portfolio.

04 — WINDMILL DESIGN

A practical windmill model demonstrating mechanical components, rotor/blade concepts, tower structure and complete assembly presentation.

PROJECT VISUALS

Design Workflow

Concept → Component identification → Blade/rotor modelling → Hub and tower → Assembly → Motion/working explanation → Manufacturing/assembly drawings.

Engineering Evidence to Add

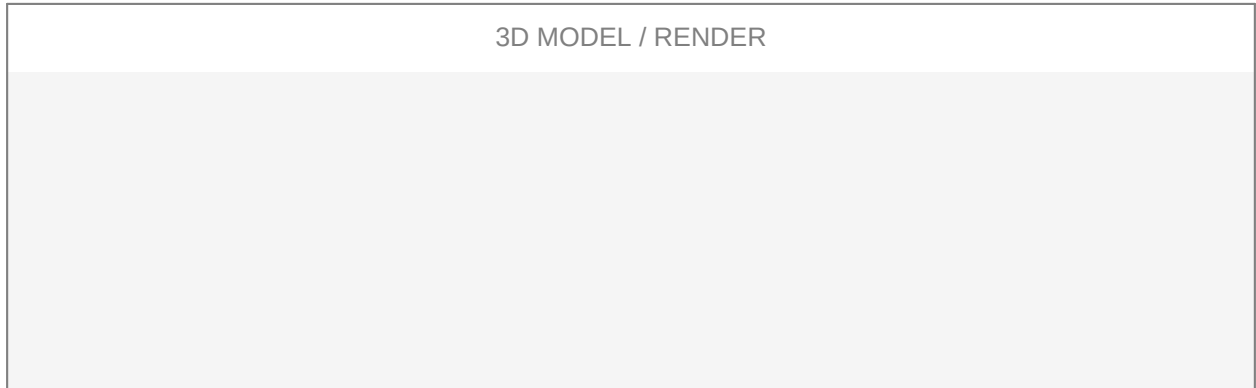

- Part drawings
- Assembly drawing
- Dimensions
- BOM
- Exploded view
- Analysis/results where applicable

NOTE: Replace the marked visual area with your actual CAD screenshots/renders for the final portfolio.

05 — FRUIT-NET MAKING MACHINE

Low-cost machine concept for producing thin plastic fruit-packaging net. The portfolio can demonstrate machine architecture, extrusion/heating, rotational forming, drive and collection systems.

PROJECT VISUALS

Design Workflow

Material feed → Heating → Extrusion/nozzle concept → Rotational mesh forming → Drive system → Cooling/collection → Frame and machine assembly.

Engineering Evidence to Add

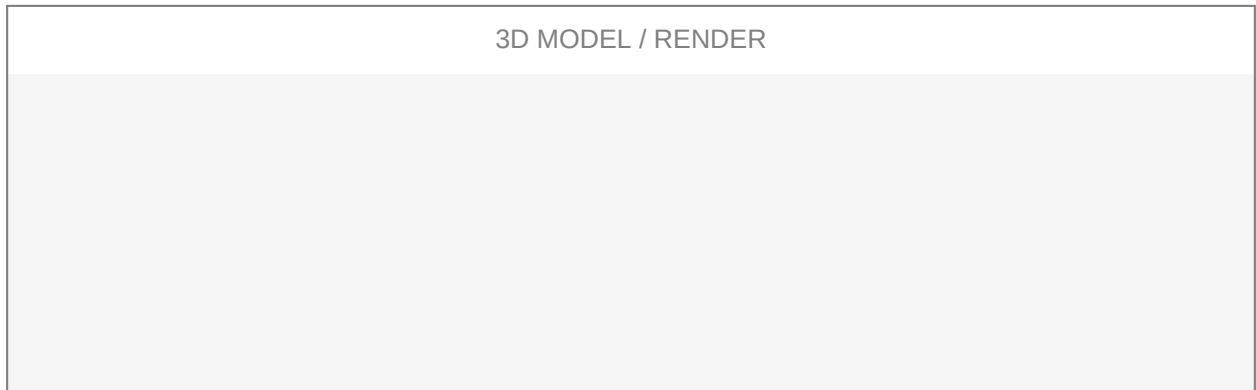

- Part drawings
- Assembly drawing
- Dimensions
- BOM
- Exploded view
- Analysis/results where applicable

NOTE: Replace the marked visual area with your actual CAD screenshots/renders for the final portfolio.

06 — OTHER CAD PROJECTS

A gallery section for additional mechanical design work such as gimbals, machine components, holding devices, fastener assemblies and product concepts.

PROJECT VISUALS

Design Workflow

Concept → CAD modelling → Assembly → Drawing → Design review → Final presentation.

Engineering Evidence to Add

• Part drawings • Assembly drawing • Dimensions • BOM • Exploded view • Analysis/results where applicable

NOTE: Replace the marked visual area with your actual CAD screenshots/renders for the final portfolio.

07 — AI VIDEO & CREATIVE WORK

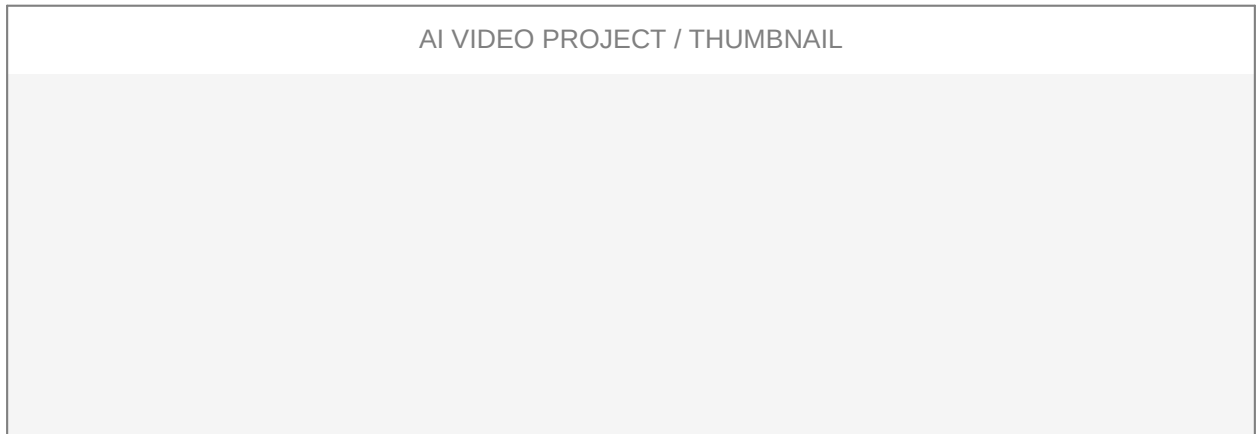

AI-assisted visual creation is included as a complementary skill for product presentation, social-media content and cinematic storytelling.

AI Video Workflow

Idea / Script → AI Image → Image-to-Video → Voice / Sound → Editing → Final Video

Portfolio Categories

- Cinematic AI videos
- Image-to-video experiments
- Product promotional videos
- Mechanical/product visualization
- Historical or cinematic scenes
- Short-form social-media content

Add your best 3–5 AI video thumbnails and clickable video links when publishing the online version.

08 — SERVICES

Mechanical Design Services

- 3D CAD modelling
- 2D manufacturing drawings
- Assembly design
- Product/machine concept development
- CAD design modification
- Basic engineering visualization

AI Creative Services

- AI image creation
- Image-to-video creation
- AI-assisted video editing
- Product promotional visuals
- Short-form cinematic content
